

JOHAN AGUSTIAN POHAN

Jalan Taud, Gang Gereja No. 09, Sidorejo, Medan Tembung, Medan

Phone: +6281264639250 | Email: johanagustianpohan@gmail.com | LinkedIn: [johan-agustian-pohan](https://www.linkedin.com/in/johan-agustian-pohan)

Final-year Informatics Engineering student (GPA 3.85/4.00) with strong focus on data analytics, backend development, and AI integration. Completed 900+ hours of intensive industry training in the Accenture–Dicoding ASAH program, earning Best Graduate and Best Capstone Project. Experienced in building data-driven applications, SQL analysis, and AI-assisted systems. Comfortable working in agile teams and translating data into actionable insights. Seeking to grow as a Data Analyst / Data Engineer trainee in a professional environment.

Education

Universitas Mikroskil – B.Sc. Informatics Engineering	Sept 2022 – Jul 2026
GPA: 3.85/4.00	

Experience

ASAH (Accenture x Dicoding) — Independent Study	Aug 2025– Dec 2025
--	--------------------

Frontend Web & Backend with AI

- Completed 900+ hours of intensive training in frontend, backend, data fundamentals, and AI integration
- Built REST APIs, designed database schemas, and worked with collaborative agile workflows
- Achieved 92/100 average score across technical assessments and evaluations.
- Awarded Best Graduate and Best Capstone Project

Capstone Project – Agentic AI-Driven Collaborative Planning Platform for Mining Production & Shipping Optimization	Sept 2025 – Dec 2025
---	----------------------

Full-Stack Developer (Backend & Frontend Integration)

- Developed a data-driven planning system to support mining production and shipping optimization
- Designed and implemented backend services and data pipelines for cross-module data flow
- Integrated AI-based recommendation system to support operational decision-making using structured system data
- Enabled communication between production and shipping modules through API-based integration and data exchange
- Achieved 96/100 evaluation score, awarded as Best Capstone Project

Back-End Engineer Intern – Rey.id (PT Vertika Technologies Nusantara)	Nov 2024 – Mei 2025
--	---------------------

PKKM Awardee (Kampus Merdeka Internship Program)

- Developed internal APIs and services in microservices architecture
- Worked with PostgreSQL, Redis, and event-driven systems
- Contributed to ±15 backend tasks improving system efficiency
- Collaborated with cross-functional teams using Jira and Confluence

Projects

Tokopedia Sales Analytics (SQL)

- Analyzed e-commerce transaction data (2021–2022) using PostgreSQL
- Generated insights on revenue trends, top products, and payment methods
- Tools: SQL, PostgreSQL
- Project documentation: [SQL Tokopedia](#)

E-Commerce Dashboard – Google Data Studio

- Built an interactive dashboard to monitor sales and profit performance in real time

- Created visual analytics using charts, filters (slicers), and KPI scorecards
- Delivered business insights to support data-driven decision making
- Tools: Google Data Studio
- Project documentation: [Data Studio](#)

Facial Similarity Detection System

- Developed a computer vision model for face classification using UTKFace dataset
- Implemented Landmark feature extraction combined with MLP model
- Achieved 84.37% accuracy on test dataset
- Built an interactive web-based prototype for visualization
- Tools: Python, Machine Learning
- Project documentation: [Deteksi Wajah](#)

Serora – AI Productivity & Burnout Prevention App

- Built an AI-based productivity application for task management and mental health monitoring
- Implemented features such as to-do list, stress tracking, burnout alerts, and AI task recommendations
- Integrated smartwatch data for behavioral monitoring and personalization
- Designed to support student well-being and time management efficiency
- Tools: AI Integration, Mobile App Concept
- Project documentation: [Serora](#)

Organization

Big Family of Informatics Students Mikroskil (BITSMIKRO)

Treasurer

2024 – 2025

- Managed organizational budget and financial reporting
- Coordinated funding allocation for events and programs

Student Aspirations Division

Nov 2023 – Nov 2024

- Organized student activities and collected feedback for improvements

Committee Experience

Webinar Web Development 101 : Front-End Vs Back-End – Bitsmikro

27 April 2024

Secretary

- Prepared documentation, proposals, and coordinated event execution

Digital Marketing Seminar - Bitsmikro

20 Jan 2024

Registration Committee

- Managed participant data and registration process.

Training & Certifications

- ASAH Independent Study Program (Accenture x Dicoding)
- Asean Data Science Explorers Enablement Session x Dampak Sosial
- Bootcamp Data Analyst – Myskill

Skills

Data and Programming

Python, SQL, PostgreSQL, Node.js, TypeScript

Data Tools and Analytics

Google Data Studio, SAP Analytics Cloud

Technologies

REST API, Microservices, Redis

Soft Skills

Problem Solving, Design Thinking, Time Management, Teamwork, Communication, Leadership
